the 8th. John A. Martin, the twelve-year-old son of the late Gov. Martin, died at the hospital at the soldiers' home the other day of hip disease, caused by an injury received while playing a year ago.

FIRE ISLAND.

Neighboring Places Resist Its Use For Cholera Purposes.

Islip and Babylon Claim That Theh Rights Are Paramount to Those of the State and Threaten to Resist the Health Officers.

SURF HOTEL, FIRE ISLAND, N. Y., Sept. 12.—There has been more excitement at Fire island than during the whole summer season. The sale of the place to the state for quarantine purposes has created a great hubbub among the towns of Islip and Babylon, who predict all kinds of dire calamities with the result of the landing of the passengers from vessels infected with cholera upon the beach.

Saturday night after the news was re ceived that Gov. Flower had given orders to buy the island the board of health of the town of Islip, in which Fire island is, called a mass meeting of citizens of the town to protest against landing of passengers at any pla in the town jurisdiction. Suffolkdale, where the meeting was held, was crowded when Supervisor W. H. Young, the president of the board of health, called it to order. Speeches were made by many prominent residents, who denounced the proposed use of the island, predicting great injury to the property adjoining and the ruin of the oyster and fish industries of the great south bay. A committee consisting of Supervisor Young, Justice Clerks Studley, O'Brien and Howell, Dr. W. A. Baker and J. S. Gilbert constituting a board of health, was appointed to go to Fire island with twenty deputy constables to protest against the use of the island for quarantine purposes and to resist the land-

ing of passengers. They left in sail boats late at night arriving there in the morning. The deputies were placed on guard when President Charles W. Wilson and Dr. Cyrus Edson, of the New York board of health, who had come to Babylon by a special train, arrived in a sail boat at 3 o'clock in the morning. They were quickly surrounded by the deputies, who made demonstrations against D. S. S. Sammis, owner of Fire island, making all kinds of threats against him for

selling it. President Wilson informed Mr. Sammis that Governor Flower had authorized the purchase for \$210,000, and that he had a certified check for \$50,000 to pay as soon as the papers were signed. Mr. Sammis then turned it over to Presid ent Wilson as the representative of Health Officer Jenkins, all the guests and most of the servants having left Saturday afternoon. When President Wilson appeared after breakfast, the local board of health and a hundred others from the main land, the crowd mostly of boys and men, made demonstrations, using threats against the state, Mr. Sammis and everybody concerned.

Coroner W. H. Moore of Bay Shore continually harangued them. At 11 o'clock President Wilson met the board of health, explained all the circumstances of the purchase and the intended use of the island. Supervisor Young and Dr. Baker stated that it would ruin the property and industries and endanger the health of the adjoining communities, and asserted that the local board of jurisdiction was paramount to the state board, and would resist any attempt to land passengers.

At the time of the sending of this dispatch affairs were assuming a serious aspect at Fire island. Although only 7:80 o'clock in the evening this will likely be the last word sent, as it has transpired that the sympathizers of the telegraphic communication between Fire island and the city. The men from Islip and other points on the main shore appear to have decided to bid defiance both to the bidding of Gov. seem to have become utterly lawless as well as reckless. As it grew dark men who had been concealed in the shadow of outbuildings began to move about more freely, as if they were certain of concealing their identity. Pickets were posted and a regular system of signals was arranged. There was no telling the exact number of men thus engaged on the island, but there could not have been fewer than fifty and there may

have been double that number.

What Will the Atchison Do? CHICAGO, Sept. 12.-A passenger rate war in transcontinental territory is now imminent, as a result of the failure of the interested roads to adjust their differences. The Atchison people have been in close conference, and it is the advisability of putting into effect at once the notice given several months ago for the establishment of a secondclass rate of \$14.70 from the Missouri river to California points. They are expected to announce their decision with-

SITUATION GRAVE.

Much Anxiety at New York Over the Cholera Situation-Condition of the Quarantined Vessels.

QUARANTINE, Sept. 9 .- The cholera situation at quarantine is no doubt very grave. Not only are new cases breaking out every day among the steerage passengers of the ill-fated Normannia and Rugia, the former of whom are on Hoffman island, but it has now settled well among the crew of the big express steamer who are now on board. If anything can be added to the horror of the situation it is the fact that the cabin passengers, who have been free from any sign of the disease, are kept like rats in a trap inclosed within the sides of the steamer with the cholera raging

alongside them. "No ship to put them on, no place where I can land them," says the health

POSITION OF THE QUARANTINED STEAMSHIPS IN THE LOWER BAY.

officer, while the agents whose duty it is to see the passengers cared for say nothing. Dr. Jenkins has made strenuous exertions to obtain a place to put the weil passengers, but up to the present he has been unsuccessful. Yesterday he thought he had everything arranged. On his return from the lower bay, where he had been with ex-Surgeon-General Hamilton to visit the site of the encampment. Dr. Jenkins announced to the reporters that all arrangements had been made. Everything appeared to be plain sailing, but a gentleman whose friends were on the steamer had shown the correspondent of the Associated press a telegram to Austin Corbin from Secretary Tracy, stating that the use of Sandy Hook had been refused. On seeing Dr. Jenkins shortly after he had gone to his office and had opened his correspondence he was asked if it was true. After slight hesitation Dr. Jenkings handed him the following telegram:

NEW YORK, Sept. 8-I am exceedingly sorry to get a dispatch from the war department sav-ing it has refused to the secretary of the treas-ury the use of Sandy Hook for the cabin pasgors. Of course this blocks any attempt on part to creet harmodes there. I had the ber and it was being loaded and it would e been at Sandy Hock this evening. A large force had been engaged, including all from Long Island railway, and it is quite too bad that we cannot bring relief in the form proposed.

I am sure, however, that the energy and good judgment displayed by you from the beginning will relieve the very uncomfortable, if no perflous, condition of the good people.

AUSTIN CORBIN.

BANDITS AT WORK. An Attempt to Bob a Santa Fe Train in the Indian Territory Desented By the

The Scandia, of the Hamburg Line, Arrives at New York in a Bad Condition—Thirty-Two Deaths From Cholera During the Voyage.

QUARANTINE, N. Y., Sept. 10.—At 1:15

o'clock this morning Dr. Jenkins re-ceived the following from Swinburne island over the cable, signed by Dr.

"Have visited the Scandia, which arrived at midnight, and find the total number of passengers 1,098 - cabin 28, steerage 981, crew 77. On the voyage there were thirty-two deaths, of which here were twenty-nine in steerage, one in cabin and two among the crew I am starting in our tug Crystal Water to transfer seven cases stricken with the plague to the hospital here on Swinburne island."

The Scandia sailed from Hamburg on August 25 and was due here yesterday. It was variously reported that she had about 909 steerage passengers and it has been expected that she would be held over with the plague ridden Hamburg-American steamers.

The worst fears are more than real-

ized. No such mortality as that which

Capt. Koff has been compelled to re-port has heretofore been recorded during the present reign of the plague. The Hamburg-American company now has six ships under the ban of the health officers, viz.: The Moravin, Rugia, Normannia, Wieland, Stubbenhuk and the Scandia. The terrible report certainly justi-

fies the fears of the health officer and also his great anxiety to provide a . safe refuge for the souls that as yet still retain health aboard the vessels at the lower roadstead.

The feelings of those on the ships that have been detained for a week when they saw the transfer boat speedto and fro between Swinburne island to the Scandia this morning may better be imagined than described The moving tag tells a story, the horror of which is increased ten fold because they cannot know the exact truth. What the daylight hours this morning may produce none can tell, but that the Scandia is all that has been feared no one will deny.

CHURCH STATISTICS.

Strength of the Methodist Church (South) and Congregationalist in the West WASHINGTON, Sept. 10.—The last cenus bulletin shows the following touching the Methodist church (south) in the state of Missouri: Number of organizations, 1,230;

TRADE REVIEW. Dun's Weekly Trade Review Very En-couraging Business Outlook Greek. NEW YORK, Sept. 10.—R. G. Dun & Co.'s weenly review of trade says: Last week's semi-panie in stocks and grain has been followed by a more confident feeling about cholera, as it is seen that pestilence is thus far confined to incom ing ships by national regulations which all officials are now respecting. Stocks have advanced about 75 cents per share on the whole, though in other markets the alarm of last week still continues The general condition of industries and trade throughout the country is not only remarkably good, but improving perceptibly from week to week, alhough the exports of merchandise are not yet large enough to prevent some

Wheat has sold at 77% cents and excepting in two days in 1884 noflower price has been recorded here. Western receipts have been 5,700,000 bushels in four days against 1,700,000 Atlantic exports. Onts are half a cent higher, but sorn is much lower, with brightening crop prospects at the west, and coffee is an eighth lower. Cotton had advanced a sixteenth during the week, although the Financial Chronicle makes the last crop 9,038,000 bales and the decrease this year only 12 per cent. With re stricted exports of products at present foreign exchange is already strong, but the treasury has put out of new notes \$200,000 more than it has added to its stocks of gold and silver, and the money markets throughout the entury are fairly supplied, while collections in all

quarters are very fair for the senson

New York, Sept. 10.—It was reported at the maritime exchange that choleraerty were held at St. John's Roman had appeared in Mexico. A cablegram Catholic church. The church was was received from Vera Cruz stating that four officers and two sailors of the barrister, The pall-bearers were: British steamship May were at that George W. Childs, Gen. Daniel port sick aboard the vessel. The steamer had put into Vera Cruz in distress, Capt. Smith being seriously handicappe in his work by the illness of his officers. The last previous report the maritime exchange had of the May was that she sailed from Mobile early last month for American ports. The May is a tramp steamer, and owned in London.

WASHINGTON, Sept. 10.—According to a table prepared by the bureau of statisties the values of the hog products exported from the United States to European countries that have removed the decrees of exclusion increased during the month of July last, as compared with the corresponding month in 1891, as follows: Denmark, from \$29,061 to ranged from 12 to 15 years in age, were \$22,787; Germany, from \$515,157 to \$367,-the assailants, the strikers not taking 049; Italy, from \$3,884 to \$21,259; Spain.
